

FishAMR-Link Automated Biosecurity Diagnostics

Generated on: 2026-07-02 08:32:18 UTC

1. Isolate Epizootic Epidemiology Profile

Property	Metadata Value
Accession ID	UNVERIFIED_ACC
Target Organism	Escherichia coli
Host Organism Strain	Salmo salar
Geographic Localization	Norway (Lat: 61.0, Lon: 6.0)

2. Mathematical Sequence Analytics Matrix

Metric	Calculated Value
Sequence Length	1268 bp
GC Content Proportion	46.29%
Shannon Informational Entropy	1.979
GC Directional Skew	0.1414

3. Identified Target Plasmid AMR Determinants

Gene Target	Functional Class	Molecular Mechanism
floR	Efflux	Active Efflux Sluice System
aacC2	Alternative-Resistance-Mechanism	Active Efflux Sluice System
